Oslo Software Secures Series B Funding Led by Script Capital, Capitalaira and NGI

Menlo Park, CA – September 23, 2008 - [Oslo Software](#), a leading provider of dynamic business applications to quickly and cost effectively optimize quality of service in manufacturing and customer service environments, recently closed a Series B funding round of \$4 million from new investors Script Capital, Capitalaira and NGI and existing investors to enhance and expand the company's product offerings, broaden recruitment efforts, and develop a stronger base of global operations.

"Securing funding from Script Capital, Capitalaira and NGI validates the potential of our business," said [Oslo Software](#) CEO Emmanuel Gonon. "The validation and support we have received from the investment community is critical to building out Oslo's business and securing our leadership role in the market."

A pioneer in the field of dynamic business applications, Oslo DREAMS, Oslo's **D**ynamic **R**esource **A**llocation and **M**anagement **S**uite, provides the only scalable solution to quickly build, change, and operate dynamic business solutions. DREAMS is particularly useful to organizations that need to optimize quality of service in manufacturing and customer service environments. Examples of successful DREAMS deployments in Semiconductor Manufacturing, On-Demand Manufacturing, Energy Production, and Banking have been deployed to provide dynamic scheduling for workforce management, contact centers, and service desk applications.

About Oslo Software

Oslo Software enables business to quickly and cost-effectively optimize the quality of service in manufacturing and customer service environments through resource allocation and management efficiency. Only Oslo Software can provide this functionality in environments characterized by high process volume, variability, and a short time to decision constraint. Oslo's Contact Center, Service Desk, and Workforce Management Dynamic Scheduling Solutions allow companies to deliver complete, end-to-end, multi-channel customer service management and process management solutions.

The company is based in Lyon, France with offices in Menlo Park, California. Please visit www.oslo-software.com for more information.
